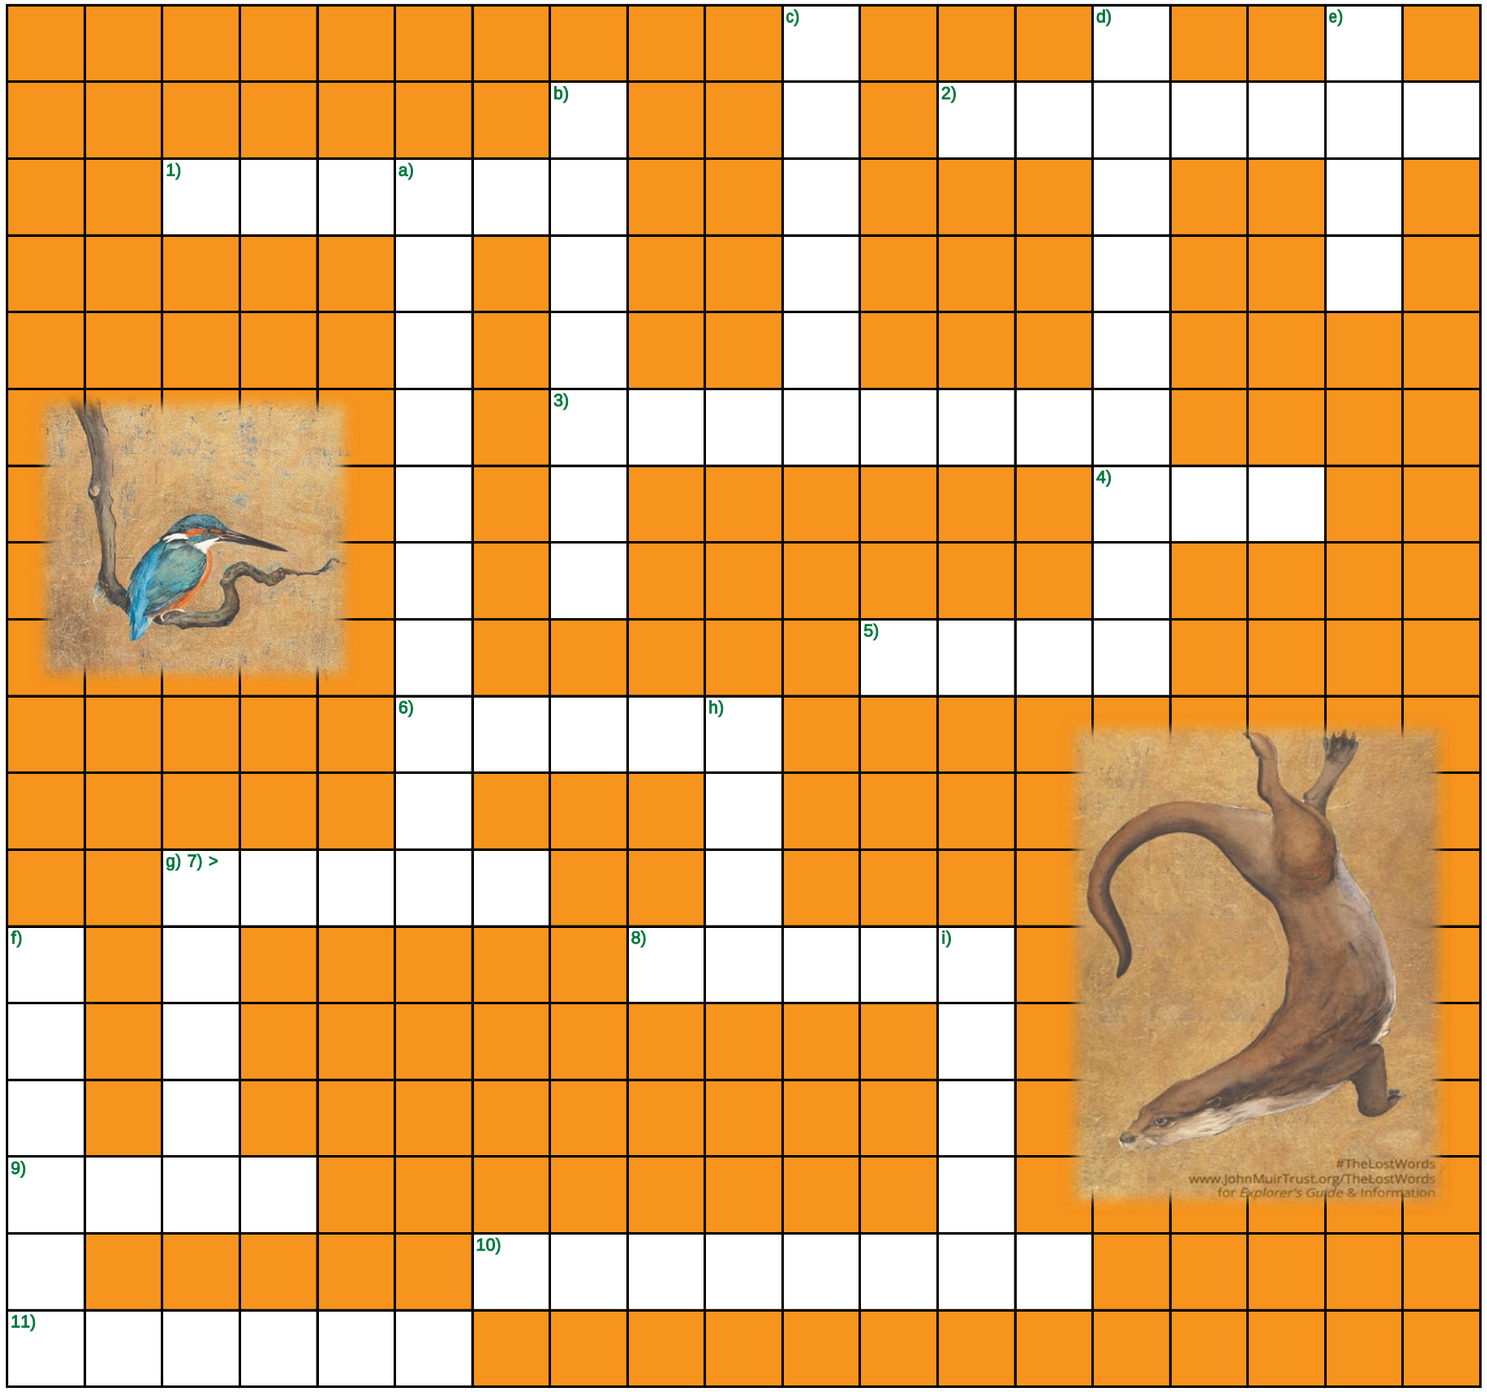
The lost words crossword puzzle

In 2017 Robert McFarlane and Jackie Morris produced a beautiful book to rekindle an awareness of words, from the natural world, which were in danger of being lost from children's vocabulary. This puzzle is based on the book, 'The Lost Words'. Use the clues and the book to complete the puzzle; or just enjoy reading the spells and looking at the amazing pictures in the book.



Across

1) A brown nut in a spiky green shell from the horse chestnut tree.
2) A small bushy plant, with purple, pink or white flowers, which grows on hills.
3) A plant that grows in woods which has small, blue, bell shaped flowers.
4) A green plant which grows on trees and buildings and doesn't lose its leaves.
5) A little brown bird you might find in your garden.
6) A very large grey bird with a sword shaped beak that feeds near water.
7) A nut that grows on oak trees which looks like it is wearing a hat.
8) A furry mammal which is a very good swimmer and eats fish.
9) A light brown bird which sings its fine song from high in the sky.
10) A black bird with white spots which is seen in huge flocks in winter.
11) A small brown, ferocious mammal which eats rabbits, mice and birds.

Down

a) A small blue bird which eats fish.
b) A thorny bush which produces blackberries.
c) A medium sized black and white bird with a long tail.
d) A small, yellow flower which grows in grass.
e) A green plant with leaves like feathers.
f) A tree with long thin branches which grows by water.
g) A venomous snake found in the UK.
h) A small animal shaped like a lizard which lives in water and sometimes on land.
i) A black bird which looks like a crow but is bigger.
